

Installing the Litter-Robot Ramp Adapter

Litter-Robot 4 (with step or handle) can be equipped with the Litter-Robot 3 Ramp using an adapter bracket. No tools are required for installation.

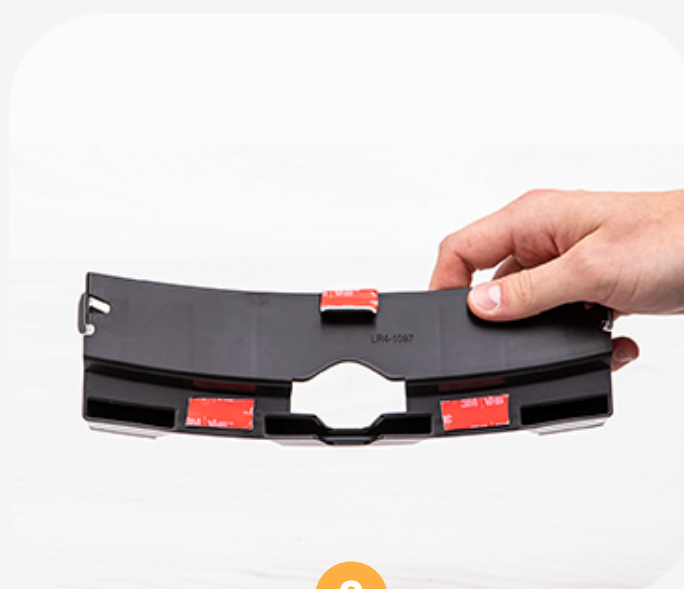

How to install

1

- ✓ Gather the Litter Robot 3 Ramp and adapter bracket.

2

- ✓ Notice the bracket has three adhesive pads. It's recommended that you practice installing the bracket onto the ramp before removing the protective red tape on the adhesive pad.

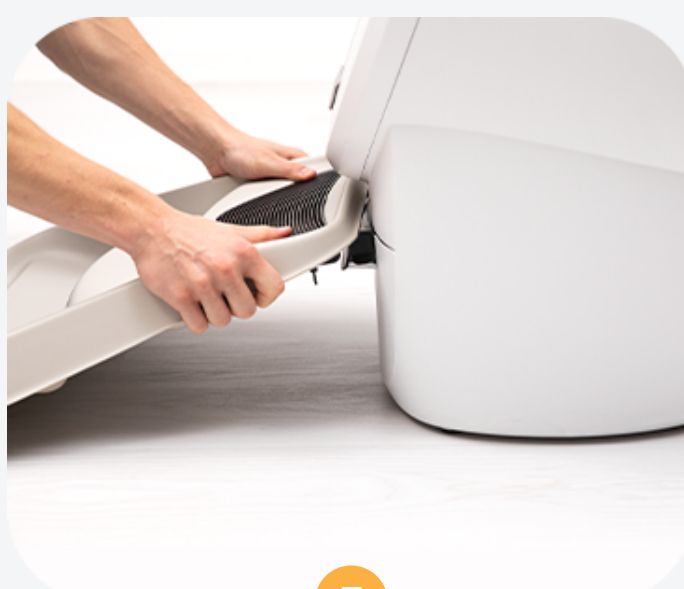

3

- ✓ Peel the red protective tape off the adhesive pads and install the bracket onto the ramp as shown. If your Litter-Robot 4 has a step, proceed to **Step 4**. If your Litter-Robot 4 has a handle, proceed to **Step 5**.

4

- ✓ Place the ramp above the step and install the ramp by inserting the bracket into the grate of the step as shown. Your installation is now complete. Note: To access the waste drawer, simply lift the ramp off the step and set aside.

5

- ✓ Slide the ramp forward onto the handle as shown. Gently push the bracket onto the handle until you hear a snap. Your installation is now complete. Note: To access the waste drawer, simply pull the ramp off the handle and set aside.
